Las Vegas, NV, March 21, 2011

Las Vegas psychic, author and resident, Zarin, has published Book 1 of the four part series, Atlantis: A Karmic Memory of the Rise & Fall. His information is channeled, and despite the disparaging attitude held by many toward this type of information, it provides an amazingly detailed picture of the lost continent and its civilization.

In the book, which is currently available as an e-book, Zarin shares details of the general location of the continent, approx. 500 miles East and 100 miles South of Bermuda. He shares many details of the land and the people who occupied it, for instance, the fact that Atlantean men stood 6' 5" to 6' 7" tall with the women averaging 5' 11" to 6'. He provides the information that Atlantis had 5 main colonies; Usar, Egis, Adon, Kular and Piron and gives locations for all 5 (described in Book 2). Included, are several of the pictographs that originated the Atlantean written language, including the pictograph that represented Atlantis itself and was displayed on the large stone slab that was recently discovered underwater at a site near Spain.

Book 1 covers the settling of Atlantis and the period during which it qualified as Paradise. It also details the events that began the change that would impress the culture of Atlantis on the entire world. What happened, who was responsible and why did things change? It is all covered in Book 1
